CalmWave: Seattle AI Profile — Product, Footprint & Verified Record

Verified: November 19, 2026 · Canonical URL: https://tygartmedia.com/calmwave-seattle-wa-ai-profile/

Verified Record Summary: As of November 19, 2026, CalmWave operates as an independent, Seed-stage Seattle health-tech startup at calmwave.com (with calmwave.ai redirecting to the canonical .com domain). Spun out of Seattle's AI2 Incubator in 2022 by founder and CEO Ophir Ronen, the company has evolved from ICU alarm-fatigue software into a hospital-wide clinical data foundation (Tessera) backed by approximately $13.6M in disclosed cumulative venture capital, including a $5.25M round in November 2024 and a $4.4M seed extension in June 2025.

Field	Verified Record (As of Nov 19, 2026)
Company	CalmWave
Official Website	https://calmwave.com/
Washington HQ	Seattle, WA (2801 Alaskan Wy, Seattle, WA 98121)
Other WA Footprint	Pier 70 waterfront / AI House hub; spun out of Seattle's Allen Institute for AI (AI2) Incubator
Founded	2022 (AI2 Incubator spinout; GeekWire 200 Fall 2026)
Founders / Leadership	Ophir Ronen (Founder & CEO)
Stage	Seed
Announced Funding	~$13.6M cumulative venture capital disclosed, including $5.25M (Nov 2024, headlined at $5.2M in GeekWire) and $4.4M seed extension (Jun 2025) backed by Third Prime, Bonfire Ventures, Catalyst by Wellstar, Silver Circle, Tau Ventures, Hike Ventures, Rebellion, Impulsum Ventures, and AI2 Incubator
Team Size	23 employees (GeekWire 200, Fall 2026)
Primary Ecosystem Ties	AI2 Incubator / AI House; 2023 & 2024 GeekWire Awards winner; GeekWire 200 index

What CalmWave Builds

CalmWave builds a hospital clinical data foundation centered on its **Transparent AI** approach and **Tessera** platform, designed to ingest, normalize, and analyze real-time clinical signals across acute-care facilities. On its official website, CalmWave focuses on unifying data streams from bedside patient monitors, connected medical devices, alarm logs, medications, and electronic health records (EHRs) across multiple vendors without replacing existing clinical hardware or middleware.

The platform reflects a documented expansion from CalmWave's initial intensive care unit focus. Early product releases—described in GeekWire's November 2024 and June 2025 reporting as "Quiet ICU" and "Calm ICU"—targeted the non-actionable bedside monitor alerts that the company states represent 80% to 99% of ICU alarms. On its current site, CalmWave frames that same longitudinal clinical signal ingestion as a system-wide data foundation for tuning vital-sign alarm limits, surfacing earlier signs of patient physiologic deterioration, and supporting Joint Commission alarm-management compliance.

Washington Footprint and Leadership

CalmWave is headquartered on Seattle's waterfront at **2801 Alaskan Wy, Seattle, WA 98121**, as listed in its Privacy Policy—co-located at Pier 70 alongside Seattle's AI House community. The company spun out of the **Allen Institute for AI (AI2) Incubator** in 2022 and remains listed as an active, independent incubator company on the AI House Companies directory.

Founder and CEO **Ophir Ronen** is a repeat Seattle entrepreneur who previously founded Event Enrichment HQ, a local startup focused on filtering and routing IT incident alerts that was acquired by PagerDuty in 2015 (GeekWire, Jun 26, 2025). That alert-noise background directly shaped CalmWave's shift from IT operations to clinical monitoring. On the Fall 2026 GeekWire 200 startup index, CalmWave is listed in Seattle with **23 employees**, following regional recognition including UX Design of the Year at the 2023 GeekWire Awards and Health Innovation of the Year at the 2024 GeekWire Awards.

Products, Users, and Public Traction

CalmWave builds for hospital and health-system stakeholders spanning nurses, physicians, clinical engineering and biomedical teams, hospital leadership and operations, and risk and quality management groups. Its canonical domain is https://calmwave.com/ (its earlier `calmwave.ai` address redirects cleanly to the `.com` site), offering platform documentation for **Transparent AI** and **Tessera** alongside role-specific clinical use cases and demo requests.

The company's most detailed public deployment is with **Wellstar Health System** (including **Wellstar Cobb Medical Center**), whose venture arm Catalyst by Wellstar is also a backer. Executive quotes on calmwave.com feature Dr. Pranav Jain (Chief Health Information Officer, Wellstar Health System), Dr. Jody Hughes (Chief Medical Officer, Wellstar Cobb Medical Center), Ryan Sanders (AVP, Clinical Engineering, Wellstar Health System), and John D. Cooper and Dr. Lori Westphal of Catalyst by Wellstar. Earlier November 2024 GeekWire coverage also noted hospital-network partnerships with **Premier, Inc.** and **Partners Co-op**. Total hospital count and revenue figures are not publicly disclosed.

Funding, Stage, and Place in Washington's AI Landscape

CalmWave is a Seed-stage company with approximately **$13.6M in cumulative venture capital** disclosed across its incubator and seed financings. Key reported tranches include a **$5.25M round** announced in November 2024 (headlined at $5.2M by GeekWire) led by **Third Prime** with participation from Catalyst by Wellstar, Silver Circle, Rebellion, Impulsum Ventures, and returning backers Bonfire Ventures, Tau Ventures, and Hike Ventures, followed by a **$4.4M seed extension** in June 2025 led by Third Prime, Bonfire Ventures, Catalyst by Wellstar, and Silver Circle alongside earlier **AI2 Incubator** backing. No Series A financing or acquisition has been publicly announced through November 2026.

Within Washington's applied healthcare AI cluster, CalmWave illustrates how local AI2 Incubator spinouts are moving down-stack from single-department point tools into hospital-wide data infrastructure. Rather than deploying opaque generative chat interfaces inside acute care, CalmWave pairs multi-vendor physiologic telemetry with explainable threshold recommendations—putting it in the same clinical-safety tier of Seattle health AI startups working directly on bedside monitoring and longitudinal patient signals.
