Other WA Footprint	Incubated at AI2 Incubator / AI House (Seattle, WA); Plug and Play Seattle Batch 2 at UW CoMotion Labs (Seattle, WA)
Founded	April 2024 (AI2 Incubator spinout, per GeekWire)
Founders / Leadership	Priyanka Kulkarni (Founder & CEO)
Stage	Seed
Announced Funding	$5M seed (announced Oct 20, 2025, per GeekWire); led by Maverick Ventures with AI2 Incubator, GTMfund, Success Venture Partners, and Jake Heller
Team Size	17 employees (Fall 2026 GeekWire 200; grew from 9 employees reported by GeekWire in Oct 2025)
Primary Ecosystem Ties	AI2 Incubator / AI House; Plug and Play Seattle (Batch 2, Sep-Dec 2025 at UW CoMotion Labs); GeekWire 200 (Fall 2026)

What Casium Builds

Casium operates an AI-native business immigration platform paired with licensed immigration attorneys and dedicated case teams. Designed to replace manual spreadsheets, scattered email threads, and slow law-firm handoffs, the software evaluates candidate visa eligibility, autonomously gathers supporting documentation, prepares filing drafts, and gives employers and applicants a single workspace to track live case status.

On its official website, Casium positions itself as a combined licensed law firm, technology platform, and global mobility partner covering both U.S. petitions and cross-border mobility across 90 countries. Its U.S. practice spans temporary work visas (**H-1B**, **O-1**, **L-1**, and **TN**) alongside employment-based permanent residency pathways (**EB-1A**, **EB-1B**, **EB-1C**, **EB-2 NIW**, and **EB-2 PERM**).

Washington Footprint and Leadership

Casium is headquartered in Seattle, Washington, listing a Seattle (98101) mailing address in its Privacy Policy and noting its origins at Seattle's AI House on its About page. The company spun out of Seattle's **AI2 Incubator** in April 2024 and remains listed as an active, unacquired portfolio startup on the AI House Incubator directory.

Casium was founded by CEO **Priyanka Kulkarni**, a former Microsoft scientist who spent a decade building foundational AI at Microsoft before joining AI2 Incubator as an Entrepreneur-in-Residence. As reported by GeekWire, Kulkarni launched Casium after navigating the U.S. EB-1 visa application process firsthand. In fall 2025, Casium also participated in Plug and Play Seattle's Batch 2 accelerator, a 12-week program hosted largely inside the University of Washington's CoMotion Labs.

Products, Users, and Public Traction

Casium serves both employers hiring international talent—ranging from early-stage startups to Series F companies—and individual founders, researchers, and professionals pursuing U.S. work visas or green cards. According to GeekWire, Casium provides free initial visa assessments, charges flat filing fees based on visa category and complexity, and has developed a subscription option for ongoing employer immigration support.

At the time of its October 2025 seed announcement, Casium told GeekWire it had assisted hundreds of candidates across visa assessments, compliance reviews, and filings; named employer clients and revenue figures are not publicly disclosed. On casium.com, the company states a 99% approval rate, a 14.5% Request for Evidence (RFE) rate, an 18-day average time to file, 11x faster filing than traditional law firms, and global mobility coverage across 90 countries. Reported team size grew from 9 employees in October 2025 (GeekWire) to 17 employees on the Fall 2026 GeekWire 200.

Funding, Stage, and Place in Washington's AI Landscape

On October 20, 2025, GeekWire reported that Casium raised a $5 million seed round led by San Francisco-based **Maverick Ventures**, with participation from **AI2 Incubator**, **GTMfund**, **Success Venture Partners**, and **Jake Heller** (co-founder of Casetext, acquired by Thomson Reuters). No subsequent institutional funding round or acquisition has been publicly disclosed through November 2026.

In Seattle's legal and compliance AI cluster, Casium focuses specifically on employer-sponsored work immigration—distinct from older Seattle consumer-immigration company Boundless Immigration, which focuses on family visas and U.S. citizenship. Its dual participation in AI2 Incubator and Plug and Play Seattle places Casium among a growing cohort of Washington startups combining domain-specific AI automation with licensed professional oversight in high-stakes regulatory workflows.
