TYGART MEDIA FIELD SHEET · CLAUDE SERIES

Claude AI for Healthcare & HIPAA — a Tygart Media field sheet

HIPAA BAA eligibility (Enterprise only), de-identified workflows, 1M-context models, and safety guardrails.

Verified 2026-11-13 against Anthropic official docs · Guide: tygartmedia.com/claude-ai-healthcare-hipaa/ · Official Anthropic: claude.com/solutions/healthcare

DIRECT ANSWER · VERIFIED 2026-11-13

Free, Pro, Max, Ultra, and Team plans are NOT HIPAA-compliant and do NOT carry a BAA. PHI workflows require **Claude Enterprise** ($20/seat/mo annual + metered API usage, 20-seat minimum) with an executed BAA (enabled permanently by the Org Primary Owner) or HIPAA-eligible API/cloud deployments (claude.com/solutions/healthcare). All current Claude models (`Fable 5.2`, `Opus 5.5`, `Sonnet 5.5`, `Haiku 5.5`) include a **1M-token context window** (128K output).

1. HIPAA & BAA Boundaries (Mandatory Compliance Rules)

- **Strict Plan Line:** Consumer plans (`Free`, `Pro`, `Max`, `Ultra`) and `Team` seats **cannot execute a BAA**. Keep PHI completely out of those tiers.
- **Enterprise Activation:** Requires an Enterprise contract (20-seat min), signed BAA, and irreversible admin toggle before any PHI enters prompts or Projects.
- **De-Identified Safe Harbor:** Without a BAA, strip all 18 HIPAA identifiers before drafting templates, patient handouts, or grant narratives.

2. High-Value Clinical, Research & Admin Workflows

- **1M-Context Literature Synthesis:** Upload systematic reviews, clinical guidelines, or protocol PDFs into a single 1M-context thread on **Fable 5.2** or **Sonnet 5.5** for evidence comparison.
- **Patient Education & Plain-Language Guides:** Convert complex clinical instructions into plain-language patient drafts for clinician review.
- **Admin & Prior-Auth Structuring:** Draft SOPs, committee policies, IRB outlines, and prior-authorization appeal templates without PHI.

Verified Claude Plan & Pricing Snapshot (Verified 2026-11-13)

Plan / Environment	Published Rate	HIPAA & BAA Status	Best Clinical Use
Claude Enterprise	$20/seat/mo annual + usage (20+ seats)	**HIPAA-ready with executed BAA** (permanent org toggle; SSO, SCIM, audit logs, no training)	Enterprise healthcare orgs with legal/compliance approval
Anthropic API / Bedrock / Vertex	Fable 5.2 $8/$40 · Opus 5.5 $4/$20 · Sonnet 5.5 $2/$10 (1M ctx)	BAA available on eligible enterprise API or cloud agreements	EHR middleware, prior-auth pipelines, FHIR tooling
Team Standard / Premium	$20/$25 mo (Std) · $100/$125 mo (Prem)	**No HIPAA BAA** (no default training, but not for PHI)	De-identified policy, admin & SOP templates only
Consumer (Free / Pro / Max / Ultra)	$0 / $20 / $100 / $200	**Not HIPAA compliant**; never enter PHI	Public medical literature review & de-identified writing

Verified 2026-11-13 against Anthropic pricing and HIPAA documentation (tygartmedia.com/claude-ai-pricing/). Enabling HIPAA mode on an Enterprise org is irreversible.

Next Steps & Implementation Checklist

- Confirm whether any PHI touches the workflow; if yes, require signed Anthropic BAA on Claude Enterprise (or BAA-covered cloud/API).
- Train clinical and billing staff that Team ($20/$25) and Pro/Max/Ultra accounts do NOT cover PHI.
- Keep clinicians in the loop: Claude synthesizes literature and drafts templates — never diagnose or override physician judgment.
- Pin department tone rules and blank template structures inside dedicated Projects (up to 5 Projects included even on Free for non-PHI testing).
