Primary Ecosystem Ties	Vancouver, WA anchor AI company; Fuse & Flying Fish backers; GeekWire 200 (Fall 2026)

What Digs Builds

Digs builds an AI-powered collaboration, construction intelligence, and 3D digital-twin software platform for residential homebuilders, organized across **DigsCloud**, **DigsCanvas**, and **DigsCare** on digs.com. Instead of leaving residential construction teams dependent on static PDF blueprints, scattered email chains, and lost homeowner binders, Digs ingests architectural plans and build documents into a structured, searchable project workspace.

Co-founder and CEO Ryan Fink frequently describes the product as a "CarFax for the home" (GeekWire, Nov 6, 2025; GeekWire, Aug 25, 2026). Its workflows carry property records from pre-construction estimating and design review through post-move-in homeowner warranty care and maintenance.

Washington Footprint and Leadership

Digs is headquartered in **Vancouver, Washington**, giving southwest Washington a scaled, Series A-funded AI software anchor outside the Seattle-Bellevue metro corridor. Its official site operates at digs.com (note that `digs.ai` does not resolve), with company background published on digs.com/about-digs.

Digs was founded in 2022 by Pacific Northwest repeat founders **Ryan Fink** (CEO) and **Ty Frackiewicz**, who previously collaborated on augmented reality glasses startup ONtheGo Platforms (acquired by Atheer in 2015) and home-service AR venture Streem (acquired by Frontdoor in 2019), with Frackiewicz also bringing a background in construction engineering and luxury homebuilding (GeekWire, Nov 6, 2025; GeekWire, Aug 25, 2026). GeekWire also reported the hiring of **Stephen Molen** as Chief Revenue Officer in late 2025. Public headcount has expanded steadily across primary reporting: 28 employees in November 2025, 37 employees in August 2026 (with plans to surpass 60 by year-end), and **58 employees** on the Fall 2026 GeekWire 200.

Products, Users, and Public Traction

Digs sells on a SaaS model to custom homebuilders, production builders, remodelers, residential designers, subcontractors, and new-home buyers. Its largest disclosed commercial milestone is a **five-year enterprise integration agreement** with Fortune 500 building-products supplier **Builders FirstSource**, announced alongside its August 2026 Series A to embed Digs' AI platform into Builders FirstSource's digital ecosystem spanning roughly 140,000 builder clients across approximately 565 locations in 43 states (GeekWire, Aug 25, 2026).

On digs.com, Digs publishes named builder testimonials from **MassaRossa Luxury Homes**, **NS Builders**, **Longo Custom Builders**, **ST Custom Homes**, **Collective Communities**, **High Caliber Homes**, **Cascade West**, and **Rogue Builders**, alongside customer-investor **Lanthorne Homes** (GeekWire, Nov 6, 2025). GeekWire reported nearly 10,000 homes on the platform in November 2025 and thousands of homes across all 50 states in August 2026, while exact revenue figures remain undisclosed. Digs also notes recognition among Fast Company's Best in AI Design.

Funding, Stage, and Place in Washington's AI Landscape

On August 25, 2026, GeekWire reported that Digs closed a **$25.3M Series A round** led by **Builders FirstSource**, pushing cumulative funding to **more than $47M**. That financing followed a **$5M pre-Series A round** in November 2025 led by Dallas-based **SPLY Capital** (with customer Lanthorne Homes participating and SPLY Capital's Tyler Williams joining the board, when GeekWire reported nearly $20M raised to date) as well as earlier seed rounds backed by regional investors including **Fuse**, **Flying Fish**, **Oregon Venture Fund**, **Portland Seed Fund**, and **Cascade Seed Fund** (GeekWire, Nov 6, 2025). Digs remains privately held and independent through November 2026.

Within Washington's AI landscape, Digs demonstrates that scaled vertical AI companies are not confined to Seattle and Bellevue. Headquartered in Vancouver with backing from both Seattle and Portland-area venture firms, Digs pairs document-heavy residential construction workflows with strategic supply-chain distribution through Builders FirstSource.
