Entire: Bellevue AI Profile — Product, Footprint & Verified Record

Verified: November 19, 2026 · Canonical URL: https://tygartmedia.com/entire-bellevue-wa-ai-profile/

Verified Record Summary: As of November 19, 2026, Entire operates at entire.com as an independent, fully remote developer infrastructure startup tied to Washington via Bellevue-based founder and CEO Thomas Dohmke (former CEO of GitHub). Backed by a $60M Seed round at an approximate $300M valuation led by Felicis with Madrona and Microsoft's M12 in February 2026, Entire expanded in October 2026 into a full GitHub-competing Git forge introducing Trails, Continuous Memory, and Agentic Search across a distributed team of 44 to 50 employees.

Field	Verified Record (As of Nov 19, 2026)
Company	Entire (Entire Inc., Delaware corporation)
Official Website	https://entire.com/
Washington HQ	Bellevue, WA (listed on Fall 2026 GeekWire 200; company operates fully remote with no traditional physical Bellevue office)
Other WA Footprint	Founder & CEO Thomas Dohmke is based in the Bellevue/Seattle area; backed by Seattle's Madrona Venture Group and Microsoft's M12
Founded	2025 (GeekWire 200 Fall 2026; emerged from stealth Feb 10, 2026)
Founders / Leadership	Thomas Dohmke (Co-founder & CEO, former GitHub CEO), Cole Driver (Co-founder, former GitHub deputy chief of staff)
Stage	Seed
Announced Funding	$60M Seed at ~$300M valuation (Feb 10, 2026; led by Felicis with Madrona, M12, Basis Set Ventures, 20VC, Cherry Ventures, Global Founders Capital, Picus Capital, Garry Tan, and Jerry Yang)
Team Size	44 employees (Fall 2026 GeekWire 200) to 50 employees (Oct 26, 2026 GeekWire; >40 across nine countries in Jul 2026)
Primary Ecosystem Ties	Madrona Venture Group; Microsoft M12; GeekWire 200 (Fall 2026); former GitHub executive leadership in Bellevue

What Entire Builds

Entire builds an AI-native distributed Git forge—described on entire.com as "The Git forge for agents"—engineered for software teams whose autonomous coding agents generate and push code faster than centralized hosting servers and human pull-request queues can absorb. Unlike legacy code hosts that store only final diffs, Entire binds prompts, agent session transcripts, and engineering rationale directly to repository commits so subsequent human or agent sessions inherit decision context.

Across 2026, Entire rolled out its stack in three distinct phases tracked by GeekWire: an open-source Checkpoints CLI in February, a distributed Git mirroring network in July, and a full GitHub-competing Git forge on October 26, 2026. Live capabilities on entire.com span regional private repository hosting across the United States (Ohio), European Union (Frankfurt), India (Mumbai), Australia (Sydney), Singapore, and Brazil (Sao Paulo), alongside native CI partnerships with **Buildkite** and **Depot**.

Washington Footprint and Leadership

Entire's corporate geography warrants explicit clarity: Entire Inc. is incorporated in Delaware and operates as a **fully remote, globally distributed company** without a traditional physical Bellevue office, employing staff across nine countries as of mid-2026 (GeekWire, Jul 8, 2026). Its Washington anchor runs through Bellevue-based co-founder and CEO **Thomas Dohmke**, who led Microsoft-owned **GitHub** for nearly four years before departing in 2025, and earlier founded mobile developer startup **HockeyApp** (acquired by Microsoft in 2014). The Fall 2026 GeekWire 200 lists Entire under Bellevue, WA.

Dohmke co-founded Entire with **Cole Driver**, a former GitHub deputy chief of staff (GeekWire, Jul 8, 2026). Publicly reported team size reflects rapid hiring through 2026: GeekWire noted more than 40 employees in July 2026, the Fall 2026 GeekWire 200 index recorded 44 employees, and GeekWire's October 26, 2026 report placed headcount at 50 employees.

Products, Users, and Public Traction

Entire builds for engineering organizations running high-volume agentic development workflows across tools such as Claude Code, OpenAI Codex, and Cursor. Developers can either mirror existing GitHub repositories onto Entire's distributed network or host private repositories natively on entire.com, offloading build and test pipelines to CI partners **Buildkite** and **Depot**. On its homepage, Entire notes that a SOC 2 Type II audit is in progress, while GeekWire's October 2026 coverage notes that public repositories and self-hosting remain on the product roadmap.

Named enterprise customers, active repository counts, and revenue figures are not publicly disclosed as of November 2026. Commercial pricing tiers have also not been publicly published; in July 2026, Madrona managing director Tim Porter told GeekWire that Entire planned to introduce a mix of seat-based and consumption-based commercial plans alongside a free tier and open-source components after its preview phase.

Funding, Stage, and Place in Washington's AI Landscape

Entire emerged from stealth on February 10, 2026 with a **$60M Seed round** at an approximate **$300M valuation**—an investment lead backer **Felicis** described as the largest seed round ever for a developer tools startup (GeekWire, Jul 8, 2026). Washington institutional backers include Seattle's **Madrona Venture Group** (led by Tim Porter and the late S. "Soma" Somasegar, who had overseen Microsoft's 2014 HockeyApp acquisition) and Microsoft's venture fund **M12**, alongside **Basis Set Ventures**, **20VC**, **Cherry Ventures**, **Global Founders Capital**, **Picus Capital**, Y Combinator CEO **Garry Tan**, and Yahoo co-founder **Jerry Yang**. No subsequent financing or acquisition has been announced through November 2026.

Within Washington's AI ecosystem, Entire sits at the center of a broader shift in software delivery infrastructure—taking direct aim at the code-review and Git-throughput bottlenecks created by autonomous coding agents, alongside rivals such as Cursor's Origin hosting service and internal source-control systems built by frontier labs. Having both Microsoft's M12 on its cap table and GitHub's former CEO at the helm makes Entire one of the Pacific Northwest's most closely watched developer-infrastructure bets.
