Loopr AI: Bellevue AI Profile — Product, Footprint & Verified Record

Verified: November 19, 2026 · Canonical URL: https://tygartmedia.com/loopr-ai-bellevue-wa-ai-profile/

Verified Record Summary: As of November 19, 2026, Loopr AI (Loopr AI, Inc.) operates as an independent manufacturing AI company based in Bellevue and the Greater Seattle area (loopr.ai, distinct from parked domain looprai.com). Winner of Startup of the Year at the 2026 GeekWire Awards and backed by a $5.4M August 2025 round led by Growth Warrior Capital ($5.4M to $5.68M cumulative), Loopr AI builds hardware-agnostic edge computer vision software for factory quality inspection.

Field	Verified Record (As of Nov 19, 2026)
Company	Loopr AI (Loopr AI, Inc.)
Official Website	https://www.loopr.ai/
Washington HQ	Bellevue, WA (Greater Seattle area, WA)
Other WA Footprint	Official Info for AI page lists Greater Seattle area, Washington, USA (exact street address not publicly disclosed); backed by Tacoma Venture Fund; co-hosted Factory AI Tour 2026 with Microsoft
Founded	2021 (Loopr AI Info for AI & GeekWire)
Founders / Leadership	Priyansha Bagaria (Founder & CEO), Kevin Hannegan (Co-founder / CPO), Anirban Konar (Co-founder / CDO)
Stage	Series A
Announced Funding	$5.4M round (Aug 2025, led by Growth Warrior Capital with Stellar Ventures and Tacoma Venture Fund; $5.4M–$5.68M cumulative)
Team Size	Not publicly disclosed
Primary Ecosystem Ties	2026 GeekWire Awards Startup of the Year winner; Tacoma Venture Fund; Microsoft Factory AI Tour 2026

What Loopr AI Builds

Loopr AI develops a hardware-agnostic AI Quality Intelligence System built to automate visual defect inspection and quality assurance on factory floors. Rather than forcing manufacturers to rip out production lines for proprietary camera rigs, loopr.ai runs edge computer vision models on plants' existing fixed cameras and operator tablets to inspect parts and surface systemic root-cause trends.

The platform spans three production checkpoints—incoming parts, inline processes such as welding, painting, and assembly, and final dispatch—while also digitizing operator checklists. Beyond defect detection, Loopr AI markets real-time plant safety monitoring, after-sales and MRO warranty documentation, visual inventory tracking, and upcoming agentic quality workflows.

Washington Footprint and Leadership

Loopr AI's corporate footprint sits in Bellevue and the Greater Seattle area: its official Info for AI page locates the company in the "Greater Seattle area, Washington, USA," regional records place its headquarters in Bellevue, and GeekWire refers to it as a Seattle-area startup (an exact street address is not publicly disclosed). Readers should note that its official domain is loopr.ai, whereas `looprai.com` is an unrelated parked for-sale page.

Loopr AI, Inc. was founded in summer 2021 by CEO **Priyansha Bagaria**, who originally built defect-detection software for her family's manufacturing business in India, alongside founding executives **Kevin Hannegan** (Chief Product Officer) and **Anirban Konar** (Chief Data Officer) (Loopr AI About Us; Info for AI). In July 2026, GeekWire Tech Moves reported that Loopr AI hired **Monica Lazo** as sales director from Boston visual-inspection firm Neurala. Loopr AI does not publicly disclose an official employee headcount.

Products, Users, and Public Traction

Loopr AI serves enterprise industrial manufacturers across aerospace (AS9100), heavy engineering, automotive and commercial vehicles, building products, medical devices (ISO 13485), battery and semiconductor production, chemicals, and data center control systems. In GeekWire reporting, Loopr AI was reported to serve **10 Fortune 1000 companies** across aerospace, automotive, and chemical manufacturing, though specific Fortune 1000 client names and revenue totals are not publicly disclosed.

In May 2026, Loopr AI won **Startup of the Year** at the 2026 GeekWire Awards, prevailing over a finalist field that included ElastixAI, Dropzone AI, Dopl Technologies, and mpathic (GeekWire, Apr 16, 2026). On loopr.ai, the company highlights co-hosting a six-city **Factory AI Tour 2026** with **Microsoft** in September and October 2026, alongside industrial program partnerships and challenges with **Marvin** (Selected Innovation Partner 2026), **TRATON** (2026), **Safran** (2024), and **Sandvik** (2023). Loopr AI claims on its homepage up to 100% inspection coverage across three checkpoints, 30% fewer quality escapes, and 20% to 30% less scrap and rework.

Funding, Stage, and Place in Washington's AI Landscape

In August 2025, GeekWire reported that Loopr AI raised a **$5.4M funding round** led by **Growth Warrior Capital**, with participation from **Stellar Ventures** and Washington-based **Tacoma Venture Fund** (Plug and Play Tech Center is also listed among backers). Industry records place cumulative funding at **$5.4M to $5.68M** including earlier seed and accelerator capital and classify the 2025 financing as Series A, while some secondary trackers describe the round as a Seed financing. No newer round or acquisition has been publicly reported through November 2026.

Within Washington's AI ecosystem, Loopr AI stands out for winning GeekWire's 2026 Startup of the Year on a relatively capital-efficient funding base while deploying edge computer vision into heavy manufacturing. Alongside Puget Sound industrial and physical-AI peers such as Reflection Robotics and Jinn Labs, Loopr AI reflects regional momentum in applied industrial AI paired with Microsoft enterprise go-to-market ties.
