Moria: Seattle AI Profile — Product, Footprint & Verified Record

Verified: November 19, 2026 · Canonical URL: https://tygartmedia.com/moria-seattle-wa-ai-profile/

Verified Record Summary: As of November 19, 2026, Moria (Moria Inc.) is an active, independent Seattle startup inside the AI2 Incubator / AI House portfolio building AI software for mining exploration and environmental technical studies. Following its September 2026 pitch at AI House Demo Day, neither an institutional funding round nor total headcount has been publicly disclosed.

Field	Verified Record (As of Nov 19, 2026)
Company	Moria
Official Website	https://onmoria.com/
Washington HQ	Seattle, WA (AI2 Incubator / AI House; street address not listed on website)
Other WA Footprint	AI House at Pier 70 (Seattle, WA)
Founded	Not publicly disclosed
Founders / Leadership	Chris Mutzel (Co-Founder); Jimmy Voorhis (Co-Founder)
Stage	Incubator (AI2 Incubator / AI House)
Announced Funding	Not publicly disclosed (backed by AI2 Incubator / AI House)
Team Size	Not publicly disclosed
Primary Ecosystem Ties	AI2 Incubator / AI House active portfolio; AI House Demo Day presenter (Sept 2026)

What Moria Builds

Moria (operating under **Moria Inc.**) builds an AI-backed platform that helps mining technical services teams process legacy geological and environmental records to produce technical studies faster. On onmoria.com, the company positions its offering under the banner 'Mining Services, Redefined,' structured around two main operating tracks: **Exploration Services** and **Environmental Services**.

According to the company's website, Moria targets four interconnected bottlenecks faced by technical services managers, study teams, and brownfield exploration groups: manual data preparation (which Moria claims consumes 30% to 50% of consulting project time), scarcity of domain experts and Qualified Professionals, project knowledge trapped inside disconnected digital silos or paper storage boxes, and costly legacy software that reinforces manual workflows.

Washington Footprint and Leadership

Moria is anchored in Seattle through **AI2 Incubator / AI House**, where it appears as an active, non-acquired portfolio company on aihouse.vc/incubator/companies and pitched on stage at AI House's Pier 70 waterfront offices during its September 2026 Demo Day. Readers checking Moria's website directly should note that onmoria.com/about lists only the corporate entity 'Moria Inc.' with a 2026 copyright and does not publish a street address, city, founder biographies, or named venture backers.

GeekWire's September 25, 2026 Demo Day coverage identifies Moria's co-founders as **Chris Mutzel** and **Jimmy Voorhis**, with Voorhis presenting the company's traction to visiting investors. Specific executive titles (such as CEO or CTO), prior career biographies, founding year, and total employee count have not been publicly disclosed in GeekWire or on the company's website.

Products, Users, and Public Traction

Moria sells to mining companies, technical services managers, study teams, geologists, and mine-site environmental managers handling brownfield exploration, database reconstruction, and compliance-heavy technical reports. The website uses an enterprise consultative intake flow ('Talk to us' and customer portal 'Log In') with no public self-serve pricing tiers.

The clearest public commercial signal came from GeekWire's September 25, 2026 Demo Day coverage: during his pitch, co-founder Jimmy Voorhis stated that one mining customer expanded a **$100,000 contract to $900,000 in two months**. Neither the customer's name nor Moria's overall customer count or annual recurring revenue has been publicly disclosed.

Funding, Stage, and Place in Washington's AI Landscape

Moria is backed by Seattle's **AI2 Incubator / AI House** and operates at the incubator stage; no external pre-seed, seed, or institutional venture funding dollar figure has been publicly announced through November 2026. Its appearance at AI House's September 2026 Pier 70 Demo Day put the company in front of both Seattle venture firms and visiting national investors from Boston, New York, Colorado, and the Bay Area.

Within Washington's AI startup landscape, Moria represents an applied industrial vertical far removed from horizontal chat wrappers or developer tools. Alongside AI2 Incubator peers automating physical-world operations like Outrun (factory workstations) and Jinn Labs (physical retail), Moria applies AI extraction and structuring to an unglamorous, high-value legacy data bottleneck—turning decades of siloed drill logs and paper records into structured inputs for regulated mining studies.
