# Resect AI: Washougal AI Profile — Product, Footprint & Verified Record

Verified: November 19, 2026 · Canonical URL: https://tygartmedia.com/resect-ai-washougal-wa-ai-profile/

**Verified Record Summary:** Resect AI is an active, independent AI safety and interpretability software company headquartered at 1700 Main St in Washougal, Washington, with 30 employees as of Fall 2026 and hiring plans toward 50 by year-end. Emerging from stealth on September 3, 2026 with $25M from undisclosed private-equity investors, the company builds the Resect NeuroWave suite to intercept unreliable LLM behavior during inference before responses commit. Investor identities and named enterprise customers have not been publicly disclosed as of November 2026.

| Field | Verified Record (As of Nov 19, 2026) |
|---|---|
| **Company** | Resect AI |
| **Official Website** | https://www.resect.ai/ |
| **Washington HQ** | 1700 Main St, Washougal, WA 98671 (Clark County) |
| **Other WA Footprint** | 4 employees including co-founders based at Washougal Main St HQ; distributed team members in the Seattle area, California, New York, and Texas |
| **Founded** | 2019 (GeekWire 200 Fall 2026); emerged publicly from stealth Sept 3, 2026 |
| **Founders / Leadership** | Kevin Owens (Founder, CEO & Chairman); Tim Walton (Co-Founder & CAIO); Tyler Gerber (Co-Founder & COO); Tommy Lofgren (Co-Founder, Chief Product & Marketing Officer); David Rueda (President & Head of Compliance); Mark Curcio (Chief Responsible AI Officer & Board Member) |
| **Stage** | Early (undisclosed private-equity-backed launch round) |
| **Announced Funding** | $25M (undisclosed private-equity investors, announced Sept 3, 2026) |
| **Team Size** | 30 (GeekWire 200 Fall 2026 & Sept 2026 reporting; targeting 50 by end of 2026) |
| **Primary Ecosystem Ties** | Washougal, WA HQ drawing from Portland and Seattle talent pools; distributed Seattle-area engineering presence; GeekWire 200 (Fall 2026) |

## What Resect AI Builds

Resect AI builds real-time neural network interpretability and hallucination-mitigation software centered on the Resect NeuroWave Product Suite, as presented on the Resect AI official website. Instead of evaluating model responses only after generation finishes, NeuroWave is engineered to inspect internal model decision-making during inference and intercept or modify unreliable behavior before outputs commit and reach end users.

Described in company launch materials and September 2026 coverage as a 'polygraph for large neural networks,' NeuroWave combines in-stream detection with enterprise audit logging and vLLM integration, pairing commercial governance tools with open-source components. On its homepage, Resect AI positions NeuroWave as available now for regulated enterprise environments deploying large language models and AI agents.

## Washington Footprint and Leadership

Unlike most venture-backed Washington AI companies clustered in Seattle or Bellevue, Resect AI operates its corporate headquarters at 1700 Main St in Washougal, Washington, along the Columbia River in Clark County. As GeekWire reported upon its September 3, 2026 stealth launch, four employees—including co-founders—work out of the Main Street headquarters while the broader 30-person team is distributed across the Seattle area, California, New York, and Texas, tapping both Seattle and Portland regional talent pools. The company reported plans to reach 50 employees by the end of 2026.

Leadership listed on resect.ai includes Founder, CEO, and Chairman Kevin Owens (who began his career at Cisco Systems, previously ran an emerging-technology incubator in San Francisco, and holds multiple patents with AI patents pending), Co-Founder and Chief AI Officer Tim Walton, Co-Founder and COO Tyler Gerber (based in Washougal), Co-Founder and Chief Product and Marketing Officer Tommy Lofgren, President and Head of Compliance David Rueda, and Chief Responsible AI Officer and Board Member Mark Curcio, alongside board member Michael Steep (formerly of HP, Apple, Microsoft, Xerox PARC, and Stanford).

## Products, Users, and Public Traction

Resect AI markets NeuroWave directly to regulated enterprises in defense, banking, and healthcare that require real-time visibility and audit logs when deploying language models and AI agents. Because the company exited stealth in early September 2026, external commercial adoption details remain limited: named enterprise customers and deployment partners are not publicly disclosed as of November 2026.

On resect.ai, the company highlights its technical bench, claiming research and engineering alumni from Stanford, Emory, Columbia, Amazon, Cisco, Google, Bloomberg, Apple, Pinterest, Pryon, and Experian. Its public legal and governance documentation—including its privacy policy and terms of use—is live alongside NeuroWave commercial availability messaging.

## Funding, Stage, and Place in Washington's AI Landscape

Resect AI announced $25 million in launch funding from undisclosed private-equity investors when it emerged from stealth on September 3, 2026, as reported by GeekWire. Both the individual private-equity backers and round structure remain undisclosed, though the $25M total is also reflected on the Fall 2026 GeekWire 200 and noted in GeekWire's Fall 2026 index analysis.

Geographically and technically, Resect AI broadens Washington's AI map in two ways: it anchors a funded AI software headquarters in Clark County outside the Seattle–Bellevue core, and it adds an inference-time interpretability approach to the state's AI safety and governance tier alongside Seattle's GLACIS and Clearly AI and Bellevue's Mpathic.
