TestSprite: Seattle AI Profile — Product, Footprint & Verified Record

Verified: November 19, 2026 · Canonical URL: https://tygartmedia.com/testsprite-seattle-wa-ai-profile/

Verified Record Summary: As of November 19, 2026, TestSprite operates an active platform at testsprite.com featuring TestSprite 4.0, AWS Marketplace availability, and an open-source Apache 2.0 CLI on GitHub. Founded in 2024 in Seattle with approximately $8.1M in total funding reported by GeekWire (including a $6.7M seed round led by Bellevue-based Trilogy Equity Partners), the company remains privately held with no subsequent round or acquisition announced.

Field	Verified Record (As of Nov 19, 2026)
Company	TestSprite
Official Website	https://www.testsprite.com/
Washington HQ	701 5th Ave, Suite 5000, Seattle, WA 98104
Other WA Footprint	Seed round led by Bellevue-based Trilogy Equity Partners; listed in AWS Marketplace
Founded	2024 (per Oct 2025 GeekWire report)
Founders / Leadership	Yunhao Jiao (Co-Founder & CEO), Rui Li (Co-Founder)
Stage	Seed
Announced Funding	~$8.1M total ($6.7M Seed in Oct 2025 led by Trilogy Equity Partners, with Techstars, Jinqiu Capital, MiraclePlus, Hat-trick Capital, Baidu Ventures, and EdgeCase Capital Partners)
Team Size	~25 (as of Oct 2025 GeekWire report)
Primary Ecosystem Ties	Downtown Seattle HQ (701 5th Ave); Trilogy Equity Partners (Bellevue); Amazon alumni lineage; AWS Marketplace; GeekWire coverage (Oct 2025)

What TestSprite Builds

TestSprite builds an autonomous AI software testing agent (**TestSprite 4.0**) that writes, executes, and maintains end-to-end frontend, backend, data, and AI-agent tests for software built by engineering teams and AI coding assistants such as GitHub Copilot, Cursor, Windsurf, and Claude Code. Rather than treating validation as a separate manual phase after deployment, TestSprite integrates directly into coding and merge workflows so every code change is checked against expected application behavior with replayable evidence.

As documented on testsprite.com and in GeekWire's October 29, 2025 report, TestSprite runs a single verification engine across four developer surfaces: a browser testing agent briefed in plain language or from PRDs and tickets, an open-source Apache 2.0 terminal CLI hosted on GitHub for unattended overnight coding agents, an IDE Model Context Protocol (MCP) server allowing developers to trigger tests in natural language, and GitHub Actions CI merge checks posting test outcomes directly to pull requests.

Washington Footprint and Leadership

TestSprite's verified corporate headquarters is in downtown Seattle: its live website footer on testsprite.com lists **701 5th Ave, Suite 5000, Seattle, WA 98104**, alongside its About page and LinkedIn company profile. The startup also distributes through AWS Marketplace and raised its seed lead check across Lake Washington from Bellevue-based Trilogy Equity Partners.

According to GeekWire, TestSprite was founded in 2024 by **Yunhao Jiao** (Co-Founder & CEO), a former Amazon software engineer and natural language processing researcher, and **Rui Li** (Co-Founder), a former Google software engineer. As of GeekWire's October 2025 report, TestSprite employed approximately 25 people; an updated 2026 headcount has not been publicly disclosed.

Products, Users, and Public Traction

TestSprite targets individual developers, QA engineers, and software teams shipping web apps, APIs, and agentic workflows alongside AI coding assistants. The platform offers a self-serve free tier alongside paid and enterprise tiers on its pricing page, an AWS Marketplace listing, and open-source CLI tooling under github.com/TestSprite.

In October 2025, TestSprite told GeekWire that its user base had grown from 6,000 to 35,000 in three months and that revenue had doubled each month following the release of TestSprite 2.0 and its MCP integration (specific dollar revenue figures were not disclosed). As of November 19, 2026, testsprite.com reports company-stated adoption of 150K+ developers, 50K+ teams, 600K+ cumulative npm installs of its MCP server and CLI since August 2025, 5K+ GitHub stars on its open-source CLI, and Product Hunt #1 Product of the Day / #2 Product of the Month honors. Company materials also highlight customer and ecosystem usage by ByteDance / Trae AI, Genrex, Princeton Pharmatech, Astronuts, Parcel AI, and Luckin Coffee.

Funding, Stage, and Place in Washington's AI Landscape

TestSprite is at the seed stage. On October 29, 2025, GeekWire reported a **$6.7M** seed round led by Bellevue-based **Trilogy Equity Partners**, with participation from **Techstars**, **Jinqiu Capital**, **MiraclePlus**, **Hat-trick Capital**, **Baidu Ventures**, and **EdgeCase Capital Partners**. The same GeekWire report notes that cumulative financing reached approximately **$8.1M** total when including earlier funding prior to the seed round. No subsequent round or acquisition has been publicly announced through November 2026.

Within Washington's developer-tools cluster, TestSprite addresses the verification bottleneck created as AI coding tools accelerate code volume faster than human review and manual QA scripts can keep up. By pairing an Apache 2.0 CLI and MCP server with continuous CI checks, it occupies a complementary layer next to Seattle startups building multi-agent project coordination, specification tooling, and automated container security patching.
