Union: Bellevue AI Profile — Product, Footprint & Verified Record

Verified: November 19, 2026 · Canonical URL: https://tygartmedia.com/union-ai-bellevue-wa-ai-profile/

Verified Record Summary: Union (operating online at union.ai) is an active, independent Bellevue, Washington AI infrastructure company with 68 employees listed on the Fall 2026 GeekWire 200. Founded by the creators of the open-source Flyte orchestration engine, the company develops a durable AI runtime and Sovereign AI Factory platform that keeps customer payloads, metadata, and logs inside enterprise security perimeters. Disclosed venture funding sits in the $38.1M–$48.1M range following a $38.1M Series A announced in February 2026.

Field	Verified Record (As of Nov 19, 2026)
Company	Union (Union.ai)
Official Website	https://www.union.ai/
Washington HQ	Bellevue, WA (listed as Seattle on GeekWire 200 Fall 2026)
Other WA Footprint	Greater Seattle metro Eastside base operating with a hybrid workforce
Founded	2020 (GeekWire reporting, Feb 2026); 2021 listed on GeekWire 200 Fall 2026
Founders / Leadership	Ketan Umare (Co-Founder & CEO); Haytham Abuelfutuh (Co-Founder)
Stage	Series A
Announced Funding	$38.1M–$48.1M ($38.1M Series A reported Feb 2026 incorporating a $19.1M May 2023 tranche; earlier April 2022 reporting cites a $10M seed; some secondary trackers cite up to $67.2M if tranches are counted separately)
Team Size	68 (GeekWire 200, Fall 2026)
Primary Ecosystem Ties	Bellevue / Greater Seattle metro HQ; GeekWire 200 (Fall 2026); open-source Flyte maintainer

What Union Builds

Union develops a durable AI runtime and Sovereign AI Factory platform built around the open-source Flyte workflow orchestration engine, as presented on the Union official website. Rather than limiting teams to batch machine learning pipelines, the platform coordinates production AI agents, data processing, distributed model training, fine-tuning, evaluations, virtual machine sandboxes, and inference gateways under one execution layer.

A central architectural focus is data sovereignty. According to Union's security architecture documentation, customer data, metadata, and operational logs stay inside the customer's own cloud account, private data center, or air-gapped environment, while Union's control plane stores only references rather than raw payloads. For engineering teams building agentic systems, the runtime supports frameworks including OpenAI, Claude, PydanticAI, and CrewAI with checkpointed model and tool calls alongside node-level VM sandboxes.

Washington Footprint and Leadership

Union is headquartered in Bellevue, Washington, within the Seattle Eastside corridor, and operates with a hybrid workforce. Regional coverage frequently refers to Union as a Seattle-area startup, and the GeekWire 200 Fall 2026 index lists the company under Seattle with 68 employees. Public records also reflect a one-year variance on founding date: GeekWire's February 2026 funding report cites 2020, while the Fall 2026 GeekWire 200 lists 2021.

The company was co-founded by CEO Ketan Umare and co-founder Haytham Abuelfutuh, who previously led infrastructure engineering teams at Lyft where they co-created Flyte to standardize machine learning workflows at scale, as detailed across Union's company page and GeekWire's 2023 funding coverage. That open-source engineering background continues to shape how Union positions its commercial platform toward infrastructure-heavy enterprise buyers.

Products, Users, and Public Traction

Union sells to enterprise AI, machine learning, and platform engineering teams operating in sectors where compute orchestration and strict data boundaries matter equally: biotech and life sciences, geospatial analytics, autonomous systems, logistics and travel, robotics, and regulated enterprise environments. Its product positioning on union.ai and technical updates on the Union blog emphasize reproducible execution and isolated sandboxing as teams shift from experimental prototypes into long-running production agents.

Across public reporting on Union and its underlying Flyte ecosystem—including GeekWire's February 2026 coverage and 2023 funding reporting—named enterprise users and customers include Spotify, Intel, LinkedIn, Stripe, ZipRecruiter, Carfax, Hopper, and HederaDx. Availability on AWS Marketplace provides an additional self-serve procurement path for cloud engineering teams.

Funding, Stage, and Place in Washington's AI Landscape

Union sits at the Series A stage with $38.1M–$48.1M in disclosed venture funding, depending on how earlier seed capital is aggregated. In February 2026, GeekWire reported that Union closed a $38.1 million Series A round by adding a $19 million extension onto a previously announced $19.1 million tranche from May 2023. Earlier April 2022 reporting and secondary venture trackers also reference a $10 million seed round—putting cumulative disclosed capital at $38.1M–$48.1M, while some third-party trackers cite up to $67.2M if tranches are counted separately.

Disclosed institutional investors include New Enterprise Associates (NEA), Mozilla Ventures, and Nava Ventures. Within Washington's AI ecosystem, Union occupies the core systems and developer-infrastructure layer alongside Seattle and Bellevue peers building portable query engines, private-deployment agents, and air-gapped enterprise runtimes—anchoring Bellevue's presence in open-source-rooted ML and agent infrastructure.
